

PROFESSIONAL SUMMARY

React Native Mobile App Developer with hands-on experience building, scaling, and publishing 6+ production-ready mobile applications on the Apple App Store and Google Play. Experienced in developing applications from scratch, enhancing commercial React Native products, integrating NestJS APIs and Firebase services, and delivering reliable, production-ready mobile solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript	Mobile Frameworks: React Native CLI, Expo
Backend & APIs: Node.js, NestJS, REST APIs	Database & Cloud: Firebase (Firestore, Cloud Functions), PostgreSQL
State & Architecture: Redux Toolkit, Context API, Offline Sync	Deployment & Tools: Google Play Console, Apple App Store Connect, Git, GitHub

COMMERCIAL EXPERIENCE

- Webwrite Pvt Limited — Mobile & Full-Stack Developer

2026 – Present

 - Contributed to 2 commercial production applications (Ubamm Wellness & Fuel Stop), developing React Native CLI mobile clients with Redux Toolkit and push notification schedulers.
 - Built and integrated NestJS REST APIs, JWT authentication, and database models to support mobile application features.
 - Implemented offline data persistence, background synchronization, and performance optimizations to improve application reliability and user experience.
- AJR Islamic App — Lead React Native Developer

2026

 - Led the complete mobile development lifecycle, from architecture and feature implementation to successful store publication.
 - Integrated Firebase (Firestore real-time sync & Cloud Functions), Context API state management, complex UI animations, and automated notification triggers.
 - Published and maintained production releases live on the [Apple App Store](#) and [Google Play Store](#).
- LetTech Partnership — React Native Mobile Developer

2025 – Present

 - Engineered, published, and maintained 3 production mobile applications on the Google Play Store, managing complete release cycles and Play Console compliance.

FEATURED PROJECTS

- AJR Deen Accountability — Lead React Native Developer

[App Store](#) [Play Store](#)

 - Built Islamic accountability app with React Native CLI, Context API, Firebase Firestore, Cloud Functions, and push notifications.
- Fuel Stop — React Native Developer (Webwrite Pvt Ltd)

Pre-Launch

 - Built driver-facing React Native CLI mobile frontend with Redux Toolkit and interactive Google Maps geolocation tracking.
- Ubamm Wellness — Full-Stack Developer (Webwrite Pvt Ltd)

Pre-Launch

 - Full-stack React Native CLI + NestJS application featuring custom health tracking modules, NestJS REST API design, and background offline data sync.
- Scan2PDF — Sole Developer & Owner

[Google Play](#)

 - Built document scanning and PDF generation app with React Native featuring fast scanning workflows, image optimization, and OCR.
- WallNex — Sole Developer & Owner

[Google Play](#)

 - Built wallpaper personalization app with infinite scrolling, image caching, and a custom Kotlin native module for instant wallpaper setting.
- Happy Stack Tower — Sole Developer & Owner

[Google Play](#)

 - Developed 2D arcade stacking game in React Native with custom collision physics, Canvas graphics, and progressive difficulty modes.

EDUCATION

Bachelors in Computer Science (BSCS) — COMSATS University Islamabad (CUI), Lahore

Feb 2023 – Feb 2027 (Final Year)
